

BUILD YOUR OWN CASTLE

A simple but fun project for all the family: build your own cool castle out of cardboard!

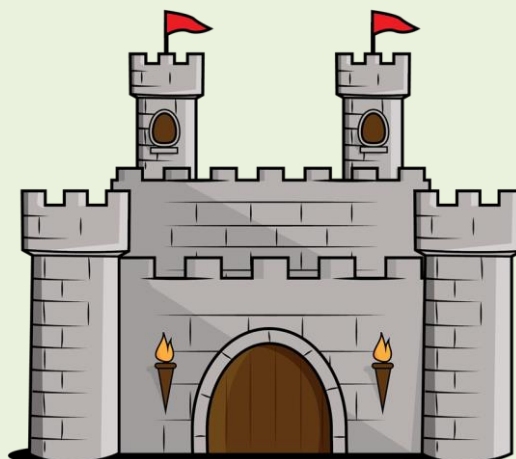

Be a medieval architect and follow our simple steps to create a fun fortress:

You will need:

- Toilet rolls
- Kitchen Towel rolls
- Lengths of cardboard slightly shorter than the height of the toilet roll inserts
- Paints and/or pens to decorate
- Matchsticks or bamboo skewer (optional)
- PVA glue and /or Sticky tape and or Black trade (optional)
- Post-it notes (optional)

GET BUILDING!!

Step 1

Cut 2 Notches approximately half the height of the toilet roll insert each notch should be perpendicular to each other.

Step 2

Cut a notch from the top of the cardboard sheet about half way down on each end so the “towers” simply slot over the walls.

Step 3

Assemble the towers and walls in to a square shape, a gateway can be cut out of one of the walls and paint and/or pens can be used to mark arrow loops.

Additional features #1

A matchstick with a post-it note attached makes a very good flag.

Additional features #2

(Adult help needed)

Scaling ladder can be made from bamboo skewers and matchsticks tied together with black thread or alternatively held together with either glue or sticky tape.
